A FREE TOOL FOR FIRE DEPARTMENTS

SmARt Kids Fire Safety Tool

FREE

SmARt Kids Fire Safety is an innovative Augmented Reality/AR tool launched with the Minnesota State Fire Chief Association to make fire safety education engaging and accessible. With a quick QR code scan, citizens unlock interactive experiences—no app, just a mobile phone. Together, will educate, inspire, & save lives **LEARN MORE: www.SmARtKidsAR.com**

Start Screen

Click the red button and accept the prompts to use your camera

Home Screen

Home Experience
Community members choose their experience: View safety materials, and of course enjoy AR experiences.

The InstantAR Experiences

Four AR experiences, these three and high fiveing a dalmatian plus downloadable safety guides - encouraging citizens to take photos, videos and instantly share on social

The Battery Boogie
We brings a smoke alarm to life to teach and remind you to check your alarm batteries.

Get Low and GO!
Our smoke experience teaches kids to crawl under the hot black, icky smoke to get to safety.

Safety Globe
Items too close to open flame/stove can cause kitchen fires, this experience shows you the space that should be clear near stove.

Upgrades packages available to customize the tool, data reports, event/tech kits & more

SAFETY GUIDES
Downloadable guides and tips for Kitchen Fires, a Smoke Alarm Quiz, Summer Safety and Grain Bin Safety.

Hey Safety Superstars

Smoke alarms are in places where we live to smell the smoke first and alert us that we need to get out and stay out. Let's see who in your family knows the most about these super important smoke alarm facts and you get to run the fun Ready, set, GO!

- Where should smoke alarms be placed in our home? Give a point for each correct answer.
 - In Every Bedroom: Make sure there's a smoke alarm where people sleep.
 - Outside Each Bedroom:
 - On Every Home Level: In the basement, on the main floor, and in the attic.
 - Special Areas: In the kitchen, near the furnace, water heater, and boiler.
 - BONUS POINT: Count all the smoke alarms in your home!
- How often should you test your smoke alarm?
 - BONUS POINT: Try the Battery Boogie testing your alarm while doing the boogie!
- How often do you change your smoke alarm batteries?
 - BONUS POINT: Get a bonus point if you change your batteries every 6 months!
- How do you know if the battery is low?
 - BONUS POINT: Get a bonus point if you know when to change your batteries!
- How often do you replace the smoke alarm?
 - BONUS POINT: Get a bonus point if you know when to replace your smoke alarm!
- How can we be prepared if there is a fire?
 - Close Before You Door:
 - Have a Home Fire Escape Plan:
 - Practice Your Plan: At least once a year.
 - Meeting Place: Pick a safe place to meet if you have to leave your home.
 - BONUS POINT: Pick your meeting place!

3 KITCHEN SAFETY TIPS

- The 3 Foot Safety Globe: Measure a 3-foot safety globe around your stove. All items within the globe should be moved away from the stove to prevent fires. Use the safety globe to prevent the space that should be clear near stove.
- When you Cook, Stay & Look: Never leave the stove unattended. If someone comes to the door or you need to tend to a family member, do not just walk away. If you need to leave, turn the burner off, prepare to smother the fire, and turn on the fire alarm.
- Never Touch A Burning Pan: If something is burning in the stovepot never touch the pan. It is too hot. If it is on a burner, turn the burner off and get the pan off the burner.
